

vola®

The Original since 1968.
Designed to last for generations.

THE ORIGINAL SINCE 1968

VOLA is the original modern tap designer.
We've had a long-term, approach
from the very beginning.

Since 1968, we've created timeless designs while
carefully managing precious resources.

RESPONSIBLE CONSUMPTION

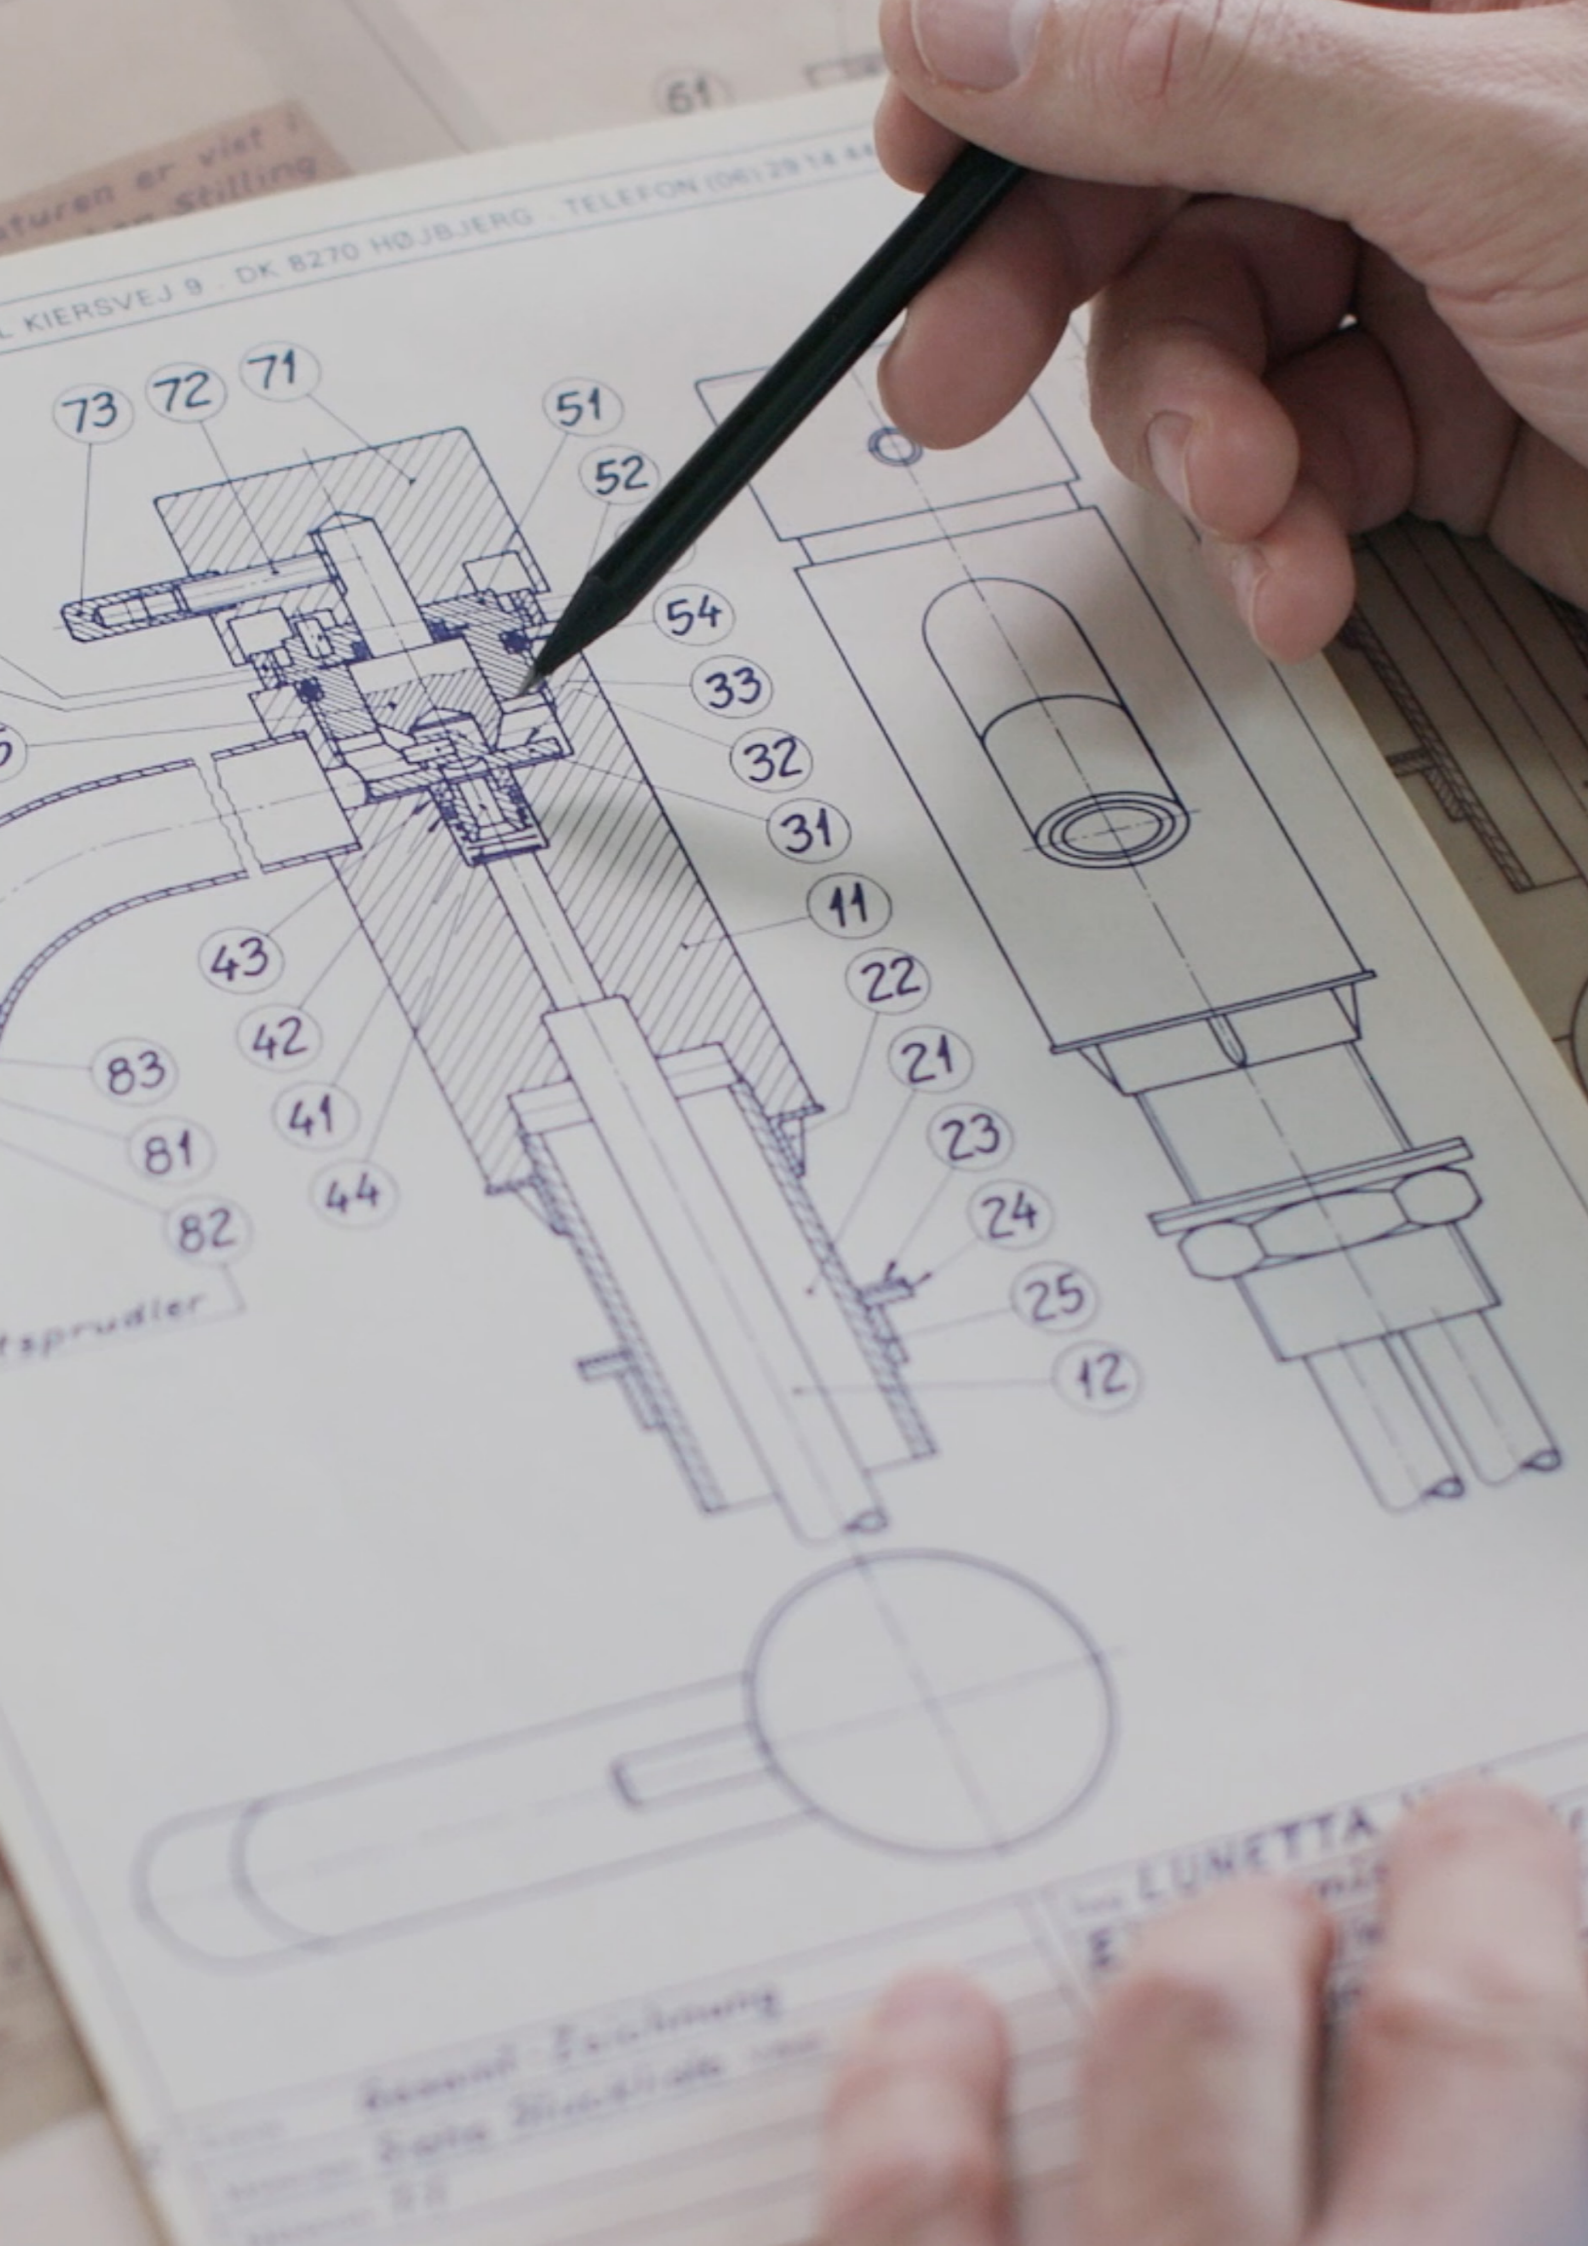

Products we created over 50 years ago continue to be the discerning choice for architects around the world today.

This means that our products will continue to be appreciated in people's homes for generations to come.

Our designs prioritise longevity over trends. VOLA is not about relentless novelty. We do not follow trends and create new products for each season.

We only release a new product when there is a genuine need for it and when every detail is right – to a timeless design, that's truly long-lasting, inside and out.

REPAIRABILITY

We have always made products that are built to last, while ensuring the internal parts of even our oldest products can be repaired and replaced. Every part matters when things are built to last.

Longevity is a promise we keep across our whole product range. From the outset, our modular design system that ensured that old parts can be replaced with new parts, even in products from 1968.

RESPONSIBLE PRODUCTION

We deeply value the world's natural resources – our products depend on them – and through conscious consumption and recycling we work hard to protect them.

CO2

We work to reduce our CO2 emissions
to become CO2 neutral by 2030
